

ADHESIVE SQUARES™

BRAND ADHESIVE DOTS CATALOG

INSTANT RESULTS FOR ANY MARKET

Easy Release, Excellent Adhesion

We Don't Cut Corners! Adhesive Squares™ brand adhesives provide **27% MORE** substrate surface area coverage than equivalent circular adhesive dots. They also include **PEAP® Technology**, which results in **easy release** from our unique liners and excellent bond adhesion to almost any substrate.

Increased Production That Lowers Cost

Adhesive Squares™ brand adhesives **eliminate setup**, maintenance, repair, cleanup and capital outlay of expensive application equipment. The **uniformity** of Adhesive Squares™ brand adhesives provides exact application standards every time for consistent finished product quality. There is no “learning curve” with Adhesive Squares™ brand adhesives. **Simply place, press and peel!**

Custom Sizes and Formulations

Since 1993, we have been formulating adhesives for **all types** of industrial use. Adhesive Squares™ brand adhesives can now be made in over **1,000 custom sizes**, with custom liners and adhesives to match your specific application needs.

Adhesive Squares™

Adhesive Squares™ brand adhesive dots are heavily used in the packaging industry. This includes general packaging, contract packaging, mail order fulfillment and sheltered workshop projects. Adhesive Squares™ also produce visible results for many applications in a vast range of consumer packaged goods from food and beverage to household products. Adhesive Squares™ are also FDA-compliant for indirect contact for food and beverage applications.

Paper Board & Packaging

- Sampling
- Inserts/Outserts
- Seal/Re-seal
- Multipacks

Printing & Mailing

- Tipping
- Displays/Point of Purchase
- Specialty Binding
- Dimensional Graphics

Food & Beverage

- Box Sealing & Repair
- Food Bag Sealing
- Secure Labeling
- Gift Basket Assembly

Material Handling & Shipping

- Corner Boards
- Pallet Stabilization
- Insulation/Packing
- Labeling & Tagging

Assembly Squares

The assembly industry calls for more than a 1/2" dot of glue. From large scale automotive assembly to small scale electronics, the instant bond of Adhesive Squares™ is perfect for aligning or temporarily holding components in place until final adhesive curing. Adhesive Squares™ are also a cost-saving solution for multi-stage assembly processes. Reduce cost and improve assembly speed with Adhesive Squares™ strips and patches.

Product Assembly

- OEM Parts Assembly
- Temporary Hold
- Foam Bonding
- Electronic Component Placement

Construction/Building

- Carpet Tiles & Flooring
- Soundproofing
- Insulation
- Gasket/Weatherstrip Seal

Specialty Squares

Adhesive Squares™ and Assembly Squares pre-engineered adhesive patches come in standard sizes, spacing and tack levels available for immediate shipment from stock. We'll also customize our products to meet your specific application requirements. Our knowledgeable sales representatives and engineers are always available to offer custom specialty square recommendations and samples.

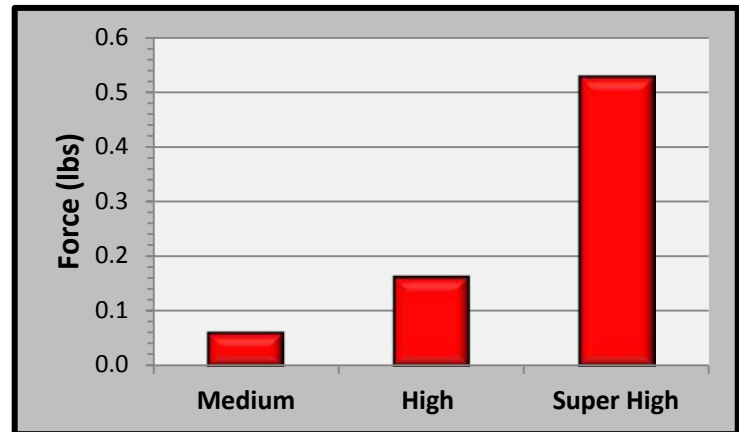

Technical Data

90° Liner Peel Test

Release from Liner

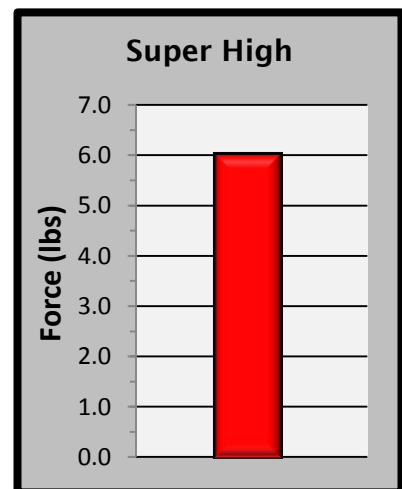

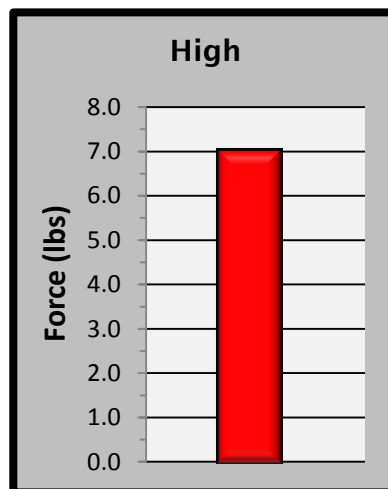

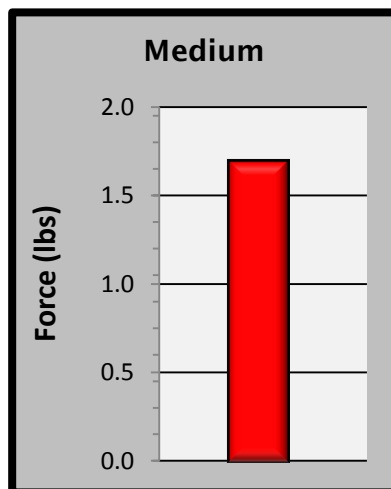

90° Liner Peel Testing of our medium, high and super high tack Adhesive Squares™ demonstrates **easy release** from the liner – making the products **easy to use** and helping to **increase production.**

Loop Tack Testing of our medium, high and super high tack Adhesive Squares™ demonstrates **excellent adhesion** to stainless steel – increasing **product integrity** to give you **peace of mind.**

Adhesive Loop Tack Test

Adhesion to Stainless Steel

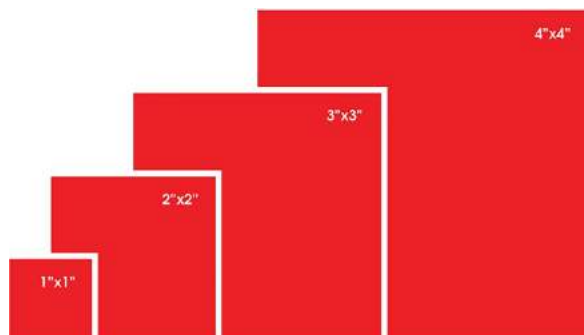

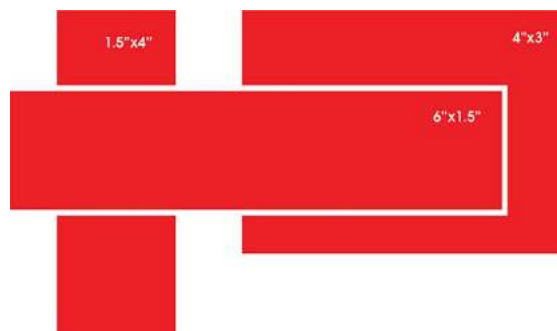

Common Sizes of Squares, Strips & Patches

Choose from our common products. We stock standard squares, strips and patches ready for quick delivery. Adhesive Squares™ brand adhesives are available in three standard adhesive grades (**medium, high and super high**) and three standard profiles (**low, medium and high**) for total versatility.

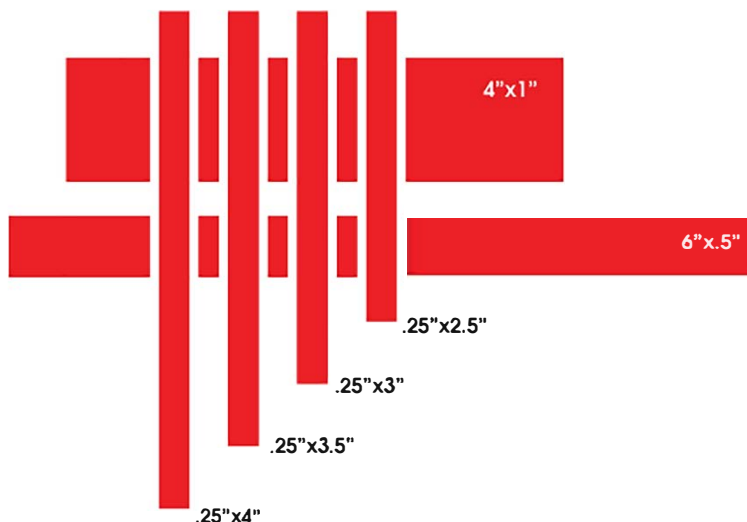

Squares

Patches

Strips

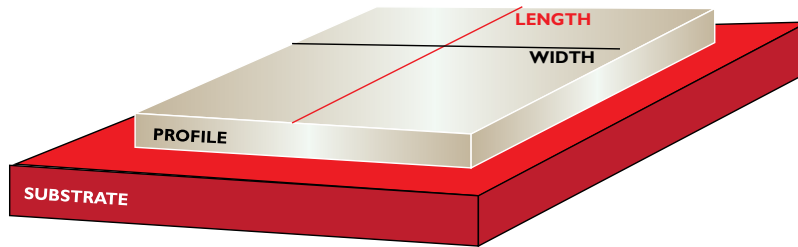

ADHESIVE SQUARES - 1/2" x 1/2" PRODUCTS

Product Number	Profile	Adhesive	Roll Count
AS-4000-M12	Low (12 mil)	Medium	4000
AS-4000-H12		High	4000
AS-4000-SH12		Super High	4000
AS-3000-M25	Medium (25 mil)	Medium	3000
AS-3000-H25		High	3000
AS-3000-SH25		Super High	3000
AS-1500-M50	High (50 mil)	Medium	1500
AS-1500-H50		High	1500
AS-1500-SH50		Super High	1500

Custom Size Squares, Strips & Patches

If we don't stock the adhesive you need, we can customize Adhesive Squares™ to your specifications for both industrial and end user applications. We have more than 1,000 sizes ranging from a 1/2" to 23" in width and length. We also offer different release liners—single, double and perforated liners for increased convenience and efficiency.

To begin your custom order:

1. Choose your desired height and width (ranging from a 1/2" to a continuous roll)
2. Select your tack level: medium, high or super high
3. Choose your profile thickness: 12 mil, 25 mil or 50 mil
4. Give us a call at 1-800-844-1740 or email us with your order!

The Right Adhesive to Match Your Exact Application

RS Industrial's on-site lab was created to provide a scientific foundation for all aspects of RSI's technical support. While our sales team is already extremely knowledgeable in the industry, the lab can arm them with the additional tools to make data-based decisions.

Easier Application

Dispenser Boxes

Our dispenser boxes make dispensing Adhesive Squares™ a breeze! Designed for maximum productivity, the dispenser box features a stand that can be pulled out and down for stability and convenience during application. Use of the dispenser box makes applying Adhesive Squares™ simple in any industrial setting! Assembly Squares™ boxes feature a perforated removable top for easy access and a saw-tooth edge for quick-tear applications.

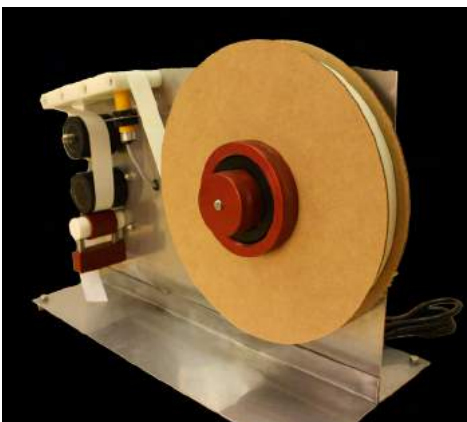

GlueGlider MAX™

Increase your production with our ergonomically designed GlueGlider MAX™. This adhesive transfer gun is designed to dispense Adhesive Squares™ cartridges in interchangeable rolls in various profiles and tack levels. The GlueGlider MAX™ offers controlled application of adhesive in exactly the right place.

GlueGlider ONE™

The GlueGlider ONE™ is an industrial-grade adhesive transfer gun that dispenses Adhesive Squares™ in squares, strips, diamonds, rails and continuous tapes in assorted patterns. This heavy-duty gun provides a substantial amount of adhesive versus traditional ATG tapes, and its ergonomic design combined with ease of use increases your production.

AutoSquares™

The AutoSquares™ bench-top applicator is an economic solution that automatically dispenses Adhesive Squares™ brand adhesive dots. Its hand-free operation maximizes productivity and reduces labor with no mess or excess glue, making it popular among contract packagers.

ADHESIVE SQUARES™

Brand Adhesive Dots

Pre-Engineered Adhesive Patch

The adhesive and release liners of Adhesive Squares™ are custom formulated for maximum adhesion. They deliver quicker release from liners, due to the chemistry of our advanced specific adhesion formulations and patented production process. This unique production process allows each square, strip or patch to have a uniform thickness, resulting in a stronger and more consistent adhesion than can be obtained through a curved contact surface.
